**THE SCIENCE BEHIND THE PRODUCTS**

As part of the TimeWise Repair® family, Volu-Fill® Deep Wrinkle Filler is a more advanced formula that contains encapsulated retinol and encapsulated hyaluronic acid. These ingredients are recognized by skin care experts and talked about in beauty magazines because of the impressive and impactful results they deliver. This formula also contains flexible elastomers, which are special, microscopic fibers that provide visible filling benefits in addition to providing a foundation for the encapsulated hyaluronic acid.

**HOW TO APPLY**

Using the precision applicator, apply the cream directly to wrinkles and gently pat in place with fingertips. Wait a few minutes before applying moisturizer. After daytime use, be sure to finish with a sunscreen product. While daily and effective broad spectrum sun protection is an essential part of any skin care program, it is especially critical when using a product that contains retinol.
